1. Document Revision History

Version	Date	Author	Description of changes / remarks
1.0	20/08/2024	eHealth platform	Major Release R2024.2 (20/10/2024)

2. Introduction

The objective of this document is to list changes, modifications, decommissions, bug corrections, which are part of this minor release **R2024.2 beginning the 15 October and ending the 20th October 2024** following canary release method.(*)

(* more explication of this method via those links:

FR: <https://www.ehealth.fgov.be/ehealthplatform/fr/service-releases-management>

NL: <https://www.ehealth.fgov.be/ehealthplatform/nl/service-releases-management>

It covers:

- New or modified functionalities to eHealth web services and web applications
- New utilities, libraries, connectors to facilitate the call to the eHealth web services (as for the end to end encryption library)
- Technical specifications and requirements (as for the network specification, system settings, minimum and compatible browser versions, patch levels, ...)
- New global solutions based on the combination of several eHealth components;
- New Authentic Sources, semantics and syntactic standards
- New Value Added Services that should be released by partners with the official partner's production date (POC) and the eHealth production date
- New procedures to be applied

If applicable, this document specifies:

- The major deliverables (components, cookbooks, forms, user guides)
- The backward compatibility (which version remains valid)
- Point of contact

For more details: see section 3 of this document and at

<https://www.ehealth.fgov.be/ehealthplatform/fr/service-releases-management> (French version)

<https://www.ehealth.fgov.be/ehealthplatform/nl/service-releases-management> (Dutch version)

3. Main new functionalities and minor changes

3.1 WebApp DB Soft (Software register)

The goal of this project is to create a shared database that will be a centralized **unique source** for the data related to software packages in the e-health domain..

3.2 DB Soft Webservices (Software Register)

The goal of this project is to create a shared database that will be a centralized **unique source** for the data related to software packages in the e-health domain.

3.3 eAttest V3

Add target group Logopedist
