1.0	22/07/2021	eHealth platform	Initial version

## 2. Use of the eHealth SSO solution

This section specifies how the call to STS must be done to have access to the web service. You must precise several attributes in the request.

To access the eAttest web services, the response token must contain:

- "true" for all of the Boolean certification attributes.
- a value for all the nihii11 certification attributes.

If you obtain:

- obtain "false" for one Boolean certification attributes;
- do not obtain any value for one of the nihii11 certification attributes;

contact [integration-support@ehealth.fgov.be](mailto:integration-support@ehealth.fgov.be) to verify that the requested test cases were correctly configured.

The documents eAttest\_STS\_samlRequest.xml and eAttest\_STS\_samlResponse.xml provide STS request/response examples.

### 2.1 Healthcare professional

The request for the SAML token is secured with the eID<sup>1</sup> of the professional. The certificate used by the Holder-Of-Key (HOK) verification mechanism is an eHealth certificate. The required attributes are the following (AttributeNamespace: "urn:be:fgov:identification-namespace"):

- The social security identification number of the professional:  
*urn:be:fgov:ehealth:1.0:certificateholder:person:ssin* and *urn:be:fgov:person:ssin*

For each professional, eHealth has to assert the following information:

- The social security identification number of the professional : (AttributeNamespace: "urn:be:fgov:identification-namespace") *urn:be:fgov:ehealth:1.0:certificateholder:person:ssin* and *urn:be:fgov:person:ssin*

Depending on the professional category, other attributes may be asserted by eHealth. These attributes are listed in the below sections.

#### 2.1.1 Doctor

Doctor must also request this attribute in the AttributeQuery :

- The NIHII number of the doctor (AttributeNamespace: "urn:be:fgov:certified-namespace:ehealth"): *urn:be:fgov:person:ssin:ehealth:1.0:doctor:nihii11*

#### 2.1.2 Dentist

Dentist must also request this attribute in the AttributeQuery :

- The NIHII number of the doctor (AttributeNamespace: "urn:be:fgov:certified-namespace:ehealth"): *urn:be:fgov:person:ssin:ehealth:1.0:dentist:nihii11*

#### 2.1.3 Physiotherapist

Physiotherapist must also request this attribute in the AttributeQuery :

---

<sup>1</sup> As fallback, in absence of the eID, the personal eHealth certificate can be used for authentication instead.

- The NIHL number of the physiotherapist (AttributeNamespace: "urn:be:fgov:certified-namespace:ehealth"):
   
*urn:be:fgov:person:ssin:ehealth:1.0:nihii:physiotherapist:nihii11*

## 2.2 Healthcare institution

The SAML token request is secured with the eHealth certificate of the institution. The certificate used by the HOK verification mechanism is the same eHealth certificate. The needed attributes depend on the institution type (for example: hospital, labo, group of nurses, ...).

### 2.2.1 Guard post

The required attributes are the following (AttributeNamespace: "urn:be:fgov:identification-namespace"):

- The NIHL number of the guard post:
  - *urn:be:fgov:ehealth:1.0:guardpost:nihii-number*
  - *urn:be:fgov:ehealth:1.0:certificateholder:guardpost:nihii-number*

The healthcare institution must also specify which information must be asserted by eHealth:

- The NIHL number of the healthcare institution (AttributeNamespace: "urn:be:fgov:identification-namespace"):
  - *urn:be:fgov:ehealth:1.0:guardpost:nihii-number*
  - *urn:be:fgov:ehealth:1.0:certificateholder:guardpost:nihii-number*
- The healthcare institution must be recognized (AttributeNamespace: urn:be:fgov:certifiednamespace:ehealth):
   
*urn:be:fgov:ehealth:1.0:certificateholder:guardpost:nihii-number:recognisedguardpost:boolean*
- The NIHL number (11 positions) of the healthcare institution (AttributeNamespace: "urn:be:fgov:certified-namespace:ehealth"):
   
*urn:be:fgov:ehealth:1.0:guardpost:nihii-number:recognisedguardpost:nihii11*

### 2.2.2 Hospital

The needed attributes are the following (AttributeNamespace: "urn:be:fgov:identification-namespace"):

- The NIHL number of the hospital :
  - *urn:be:fgov:ehealth:1.0:hospital:nihii-number*
  - *urn:be:fgov:ehealth:1.0:certificateholder:hospital:nihii-number*

Hospital must also specify which information must be asserted by eHealth:

- The NIHL number of the hospital (AttributeNamespace: "urn:be:fgov:identification-namespace"):
  - *urn:be:fgov:ehealth:1.0:hospital:nihii-number*
  - *urn:be:fgov:ehealth:1.0:certificateholder:hospital:nihii-number*
- The hospital must be a recognized hospital (AttributeNamespace: urn:be:fgov:certifiednamespace:ehealth):
  - *urn:be:fgov:ehealth:1.0:certificateholder:hospital:nihii-number:recognisedhospital:boolean*
- The NIHL number(11 positions) of the hospital (AttributeNamespace: "urn:be:fgov:certified-namespace:ehealth"):
  - *urn:be:fgov:ehealth:1.0:hospital:nihii-number:recognisedhospital:nihii11*

## 2.3 Mandate holder

### 2.3.1 Mandated organization

The SAML token request is secured with the eHealth certificate of the mandated organization. The certificate used by the HOK verification mechanism is the same eHealth certificate. The needed attributes are the following (AttributeNamespace: "urn:be:fgov:identification-namespace"):

- The CBE number of the mandated organization:
  - *urn:be:fgov:ehealth:1.0:certificateholder:enterprise:cbe-number*
  - *urn:be:fgov:kbo-bce:organization:cbe-number*

Mandated organization must also specify which information must be asserted by eHealth:

- The CBE number of the mandated organization (AttributeNamespace: "urn:be:fgov:identification-namespace"):
  - *urn:be:fgov:ehealth:1.0:certificateholder:enterprise:cbe-number*
  - *urn:be:fgov:kbo-bce:organization:cbe-number*
- The mandated organization must be a recognized mandated organization (AttributeNamespace: "urn:be:fgov:certified-namespace:ehealth"):  
*urn:be:fgov:kbo-bce:organization:cbe-number:ehealth:1.0:recognisedmandatory:boolean*
- The service name :  
*urn:be:fgov:ehealth:1.0:servicename:external* with the value 'attest'

### 2.3.2 Mandated person

The request for the SAML token is secured with the eID<sup>2</sup> of the mandated person. The certificate used by the HOK verification mechanism is an eHealth certificate. The needed attributes are the following (AttributeNamespace: "urn:be:fgov:identification-namespace"):

- The social security identification number of the mandated person:
  - *urn:be:fgov:ehealth:1.0:certificateholder:person:ssin*
  - *urn:be:fgov:person:ssin*

Mandated person must also specify which information must be asserted by eHealth:

- The social security identification number of the mandated person: (AttributeNamespace: "urn:be:fgov:identification-namespace") :
  - *urn:be:fgov:ehealth:1.0:certificateholder:person:ssin*
  - *urn:be:fgov:person:ssin*
- The person must be a recognized mandated person: (AttributeNamespace: "urn:be:fgov:certified-namespace:ehealth")  
*urn:be:fgov:person:ssin:ehealth:1.0:recognisedmandatory:boolean*
- The service name (AttributeNamespace: "urn:be:fgov:identification-namespace"):  
*urn:be:fgov:ehealth:1.0:servicename:external*  
with the value 'attest'

---

<sup>2</sup> As fallback, in absence of the eID, the personal eHealth certificate can be used for authentication instead.
