2 Use of the eHealth SSO solution

The complete overview of the profile and a step-by-step implementation to start protecting a new application with SSO @ eHealth is described in the eHealth SSO cookbook.

This section specifies how the call to STS must be done to have access to the web service. You must precise several attributes in the request.

To access to RNConsult web service, the response token must contain a value *true* the certification attribute.

The required identification attributes are the following:

- **AttributeName**= *urn:be:fgov:hehealth:1.0:certificateholder:person:ssin*
- **AttributeName**= *urn:be:fgov:hehealth:person:ssin*

You must also specify which information must be asserted by eHealth:

- **AttributeName**= *urn:be:fgov:person:ssin:hehealth:1.0:consultrn:professional:boolean*
- **AttributeName**= *certification urn*

Where *certification urn* to use is related to the individual profession.
