2. Introduction

The objective of this document is to list changes, modifications, decommissions, bug corrections that are part of this major release **R2017.2** of **22th October 2017**.

This covers:

- New or modified functionalities to eHealth platform web services and web applications
- New utilities, libraries, connectors to facilitate the call to the eHealth platform web services (as for the end to end encryption library)
- Technical specifications and requirements (as for the network specification, system settings, minimum and compatible browser versions, patch levels, ...)
- New global solutions based on the combination of several eHealth platform components
- New Authentic sources, semantics and syntactic standards
- New Value Added Services that should be released by partners with the official partner's production date (POC) and the eHealth platform production date
- New procedures to be applied

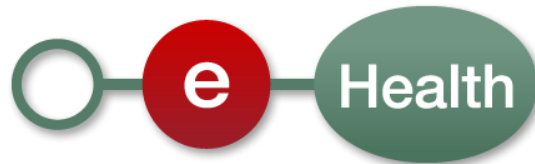

If applicable, this document specifies:

- The major deliverables (components, cookbooks, forms and user guides)
- The backward compatibility (which version remains valid or not)
- Point of contact

More detail can be found in section 4 of this document and on

<https://www.ehealth.fgov.be/fr/support/presentation-du-support> (Dutch)

<https://www.ehealth.fgov.be/nl/support/presentatie-van-de-support> (French)
