1. Document Revision History

Version	Date	Author	Description of changes / remarks
1.0	17/03/2017	eHealth	Major Release R2017.1 (21/05/2017)

2. Introduction

The objective of this document is to list changes, modifications, decommissions, bug corrections that are part of this major release **R2017.1** of **21 May 2017**.

This covers:

- New or modified functionalities to eHealth web services and web applications
- New utilities, libraries, connectors to facilitate the call to the eHealth web services (as for the end to end encryption library)
- Technical specifications and requirements (as for the network specification, system settings, minimum and compatible browser versions, patch levels, ...)
- New global solutions based on the combination of several eHealth components
- New Authentic sources, semantics and syntactic standards
- New Value Added Services that should be released by partners with the official partner's production date (POC) and the eHealth production date
- New procedures to be applied

If applicable, this document specifies:

- The major deliverables (components, cookbooks, forms and user guides)
- The backward compatibility (which version remains valid or not)
- Point of contact

More details can be found in section 4 of this document and on

<https://www.ehealth.fgov.be/fr/support/presentation-du-support> (French version)

<https://www.ehealth.fgov.be/nl/support/presentatie-van-de-support> (Dutch version)

3. Main new functionalities and major changes

3.1 Activation of a new certificate for Timestamping

The new timestamping server certificate will be activated on **7/05/2017**. (Reason: new hardware).

3.2 Mediprima

- For the extension of Mediprima to physicians: 2 new webservices will be made available.
- The Mediprima Consultation Web service - New version of the Carmed consultation service initially planned for hospitals only. This new service clarifies, among other things, the comment field.
- The Mediprima Tarifs Consultation Web service - New service initially intended for physicians .It is a service similar to the tarification service (MycareNet) but specifically intended to cover the persons covered by Mediprima (by agreement with The CPAS).
- These two services are to be integrated in conjunction with MycareNet's electronic billing service.

3.3 eATTEST

Preparation of Acceptance tests for CIN & OA's

3.4 eHBox

- Adaptation of the last access record (only once a day)
- Denormalization of metadata
- Updating the link to the user manual
- Correction of the consultation of the history of news

3.5 ConsultRN

New SSIN History service

3.6 Exclusions Web Service

New web service for the management of exclusions of healthcare providers by patients.

3.7 Consent Webapp

Removal of access to healthcare providers, pharmacies, hospitals, and OA

3.8 DaaS (DataAttributeService)

New operation: call to MyCareNet services

3.9 EMSR (Emergency Medical Service Registry)

New pipe

3.10 Evolutionary maintenance and corrections
