1. Document Revision History

Version	Date	Description
1.0	07/10/2015	Major Release R2015.2(25/10/2015)

2. Introduction

The objective of this document is to list changes, modifications, decommissions, bug corrections that are part of this major release **R2015.2** of **25th October 2015**.

This covers:

- New or modified functionalities to eHealth web services and web applications
- New utilities, libraries, connectors to facilitate the call to the eHealth web services (as for the end to end encryption library)
- Technical specifications and requirements (as for the network specification, system settings, minimum and compatible browser versions, patch levels, ...)
- New global solutions based on the combination of several eHealth components
- New Authentic sources, semantics and syntactic standards
- New Value Added Services that should be released by partners with the official partner's production date (POC) and the eHealth production date
- New procedures to be applied

If applicable, this document specifies:

- The major deliverables (components, cookbooks, forms and user guides)
- The backward compatibility (which version remains valid or not)
- Point of contact

More details can be found in section 4 of this document and on <https://www.ehealth.fgov.be>

3. Main New Functionalities and Major Changes

3.1 eHealth Certificates

In order to maintain committed security level, the eHealth platform will start to deliver SHA-256 certificates through GOV CA 2014_02 instead of SHA-1 certificates.
